

Bergerson Windows

The industries finest custom solid wood windows and doors.

“Quality is never an accident; it is always the result of high intention, sincere effort, intelligent direction and skillful execution; it represents the wise choice of many alternatives.”

–William A. Foster

Quality

Is what we strive to produce throughout our whole product line. In windows and doors we measure quality with a bigger picture in mind. Several factors help keep a balance of idealism and common sense.

Fenestration

Is not just how it works but also how it fits into the architectural flavor and styling of the whole. To compromise this is to undermine the full potential of your building.

Custom size and detailing

True Divided Lites

Value

Is measured not just in dollars and cents but in many other factors that can stand the test of time. The right windows and doors can increase the overall worth of your project.

Old World craftsmanship with New World benefits

Exceeds architectural and aesthetic expectations

Functionality

Is achieved through solid design ideals. The windows and doors are the part of your structure that both separate and connect you with the environment surrounding your dwelling. Each building is unique in its purpose and challenges.

Proven design & traditional lines

Compatible product families (series) that integrate well together

Longevity

The potential of what we put together needs to add up to the long life span of the overall project.

Fine-grained, Western Red Cedar & Douglas Fir; stable and rot resistant

Corrosion resistant hardware

Maintainable-repairable design

Marine grade adhesives

Responsibility

Is challenged throughout the whole process, from harvesting trees to maintenance in the years to come. Getting the most out of raw material and the total energy is the right thing to do.

Many glazing options

Energy conscious weather-strip

The highest and best use for premium material
